                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         This invention relates to a novel DNA sequence in the field of plant disease, in particular comycete infections. The DNA sequence encodes a procein which may provide a plant or its progeny with at least partial resistance against an comycete infection caused by Phytophthora infestans. The invention may be useful for the development of compounds with a fungicide activity. The DNA sequence of the invention encodes an Rpi-blb protein comprising 970 amino acids. The nucleic acid, vector, cell, protein or binding molecule is useful for providing a plant or its progeny with resistance against an comycette infection such as late blight (a disease of major importance to production of Solanacease such as potato and tomato cultivars). The present sequence is that of a fragment of the Sulbocastanum Rpi-blb protein which is related to the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          New isolated or recombinant Rpi-blb nucleic acids and proteins, useful for providing members of the Solanaceae family e.g. Solanaceae tuberosum with resistance against comycete infection.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             δ
                                           This invention relates to novel isolated polynucleotides that confer CC resistance against late blight caused by the comycete pathogen CC Phycophthora infestans, which threatens both tomato and potato crops. CC Specifically, it refers to a gene cluster (namely Rpi-blb) that encodes clucine-rich repeat (IRR) proteins identified in Solanum bulbocastanum, CC and which cause disease resistance to bacteria, fungi, nematodes etc. CC These R genes, namely Rpi-blb, RGC1-blb, RGC3-blb and RGC4-blb, can be CC described as plant growth regulants. They are useful in providing CC resistance to Phytophthora infestans, especially in Solanum tuberosum CC (potato) plants to protect against oomycete infection or to demonstrate CC disease susceptibility. Resistance can be conferred by transformation of CC existing potato and tomato cultivars with the gene, a procedure that is CC constrained to the sequence is the Solanum bulbocastanum BAC SPB4 CC genomic DNA fragment, present in RGC2-blb of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            吊

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            This invention relates to novel isolated polynucleotides that confer CC resistance against late blight caused by the comycete pathogen CC Phytophthora infestans, which threatens both tomato and potato crops. CC Specifically, it refers to a gene cluster (namely Rpi-blb) that encodes CC Specifically, it refers to a gene cluster (namely Rpi-blb) that encodes CC encine-rich repeat (LRR) proteins identified in Solanum bulbocastanum, CC and which cause disease resistance to bacteria, fungi, nematodes etc. CC These R genes, namely Rpi-blb, RGC1-blb, RGC3-blb and RGC4-blb, can be CC described as plant growth regulants. They are useful in providing CC resistance to Phytophthora infestans, especially in Solanum tuberosum CC (potato) plants to protect against comycete infection or to demonstrate CC disease susceptibility. Resistance can be conferred by transformation of CC existing potato and tomato cultivars with the gene, a procedure that is CC concertion of the conference is the Solanum bulbocastanum RGC3-blb coding CC invention an intronic sequence in an exemplification of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        New resistance gene conferring resistance against an oomycete pathogen, useful for producing plants, especially potatoes and tomatoes, resistan against comycete pathogens such as Phytophthora infestans.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 3971

New isolated or recombinant Rpi-bib nucleic acids and proteins, useful for providing members of the Solanaceae family e.g. Solanaceae tuberosum with resistance against comycete infection.  Claim 6; SEG ID NO 52; 98pp; English.  This invention relates to a novel DNA sequence in the field of plant disease, in particular comycete infection caused by Phytophhora infestans. The invention may be useful for the development of compounds with a fungicide activity. The DNA sequence of the invention encodes an protein which may provide a plant or its progeny with at least partial resistance against an comycete infection such as late blight (a disease of major importance to production of Solanaceae such as potato and tomato cultivars). The present sequence is that of the S bight of the S b | ADH51535;  ADH51535;  25-MAR-2004 (first entry)  S bulbocastanum RGC3-blb gene SeqID52.  plant disease; comycete infection; Phytophthora infestans; fungicide; plant; disease; power potato; tomato; gene; dis; RGC3-blb. This invention relates to novel isolated polynucleotides that confer CC resistance against late blight caused by the comycete pathogen CC Phytophthora infestans, which threatens both tomato and potato crops. Specifically, it refers to a gene cluster (namely Rpi-blb) that encodes CC Specifically, it refers to a gene cluster (namely Rpi-blb) that encodes CC and which cause disease resistance to bacteria, fungi, nematodes etc. CC These R genes, namely Rpi-blb, RCC1-blb, RCC3-blb and RCC4-blb, can be CC described as plant growth regulants. They are useful in providing cresistance to Phytophthora infestans, especially in Solanum tuberosum CC (potato) plants to protect against comycete infection or to demonstrate CC disease susceptibility. Resistance can be conferred by transformation of existing potato and tomato cultivars with the gene, a procedure that is comore straightforward and faster than conventional introgression breeding. This polynucleotide sequence is the Solanum bulbocastanum RCC4-blb coding DNA containing an intronic sequence in an exemplification of the
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                New resistance gene conferring resistance against an oomycete pathogen, useful for producing plants, especially potatoes and tomatoes, resistan against oomycete pathogens such as Phytophthora infestans.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   /note= "This sequence contains 3 introns and
